

## Study Update

RETAKE opened to recruitment on **8<sup>th</sup> May 2018** - we now have 8 sites open and 33 participants recruited.

**Well done to Somerset Partnership** who are currently our top recruiters with 10 participants!

**A big thanks goes out to the teams at all sites** for their hard work to date in getting the RETAKE study up and running across the country. We appreciate your ongoing support and look forward to working with you over the coming months.

## Recruitment (correct as of 15/08/2018)

**33**  
Participants  
Randomised!

### August Recruitment

2 weeks into the month we have no randomisations yet... Please do what you can to increase patient screening, identification and recruitment to help maintain the steady recruitment rate – Thank you!

## Coming Soon!

- Guy's and St Thomas' NHS Foundation Trust
  - Lewisham and Greenwich NHS Trust
  - East Kent Hospitals University Foundation Trust
  - Kent Community Health Trust
  - East Sussex Healthcare NHS Trust
  - Brighton and Sussex University Hospitals
  - Sussex Community NHS Trust
  - Hounslow & Richmond Community Healthcare NHS Trust
- ...will all be coming on board soon!**

## UK Stroke Forum

Dr Kate Radford and the team will be providing an update on the RETAKE study at this years UK Stroke Forum (5 & 6<sup>th</sup> December 2018). This will be a great opportunity for study teams at sites to meet the RETAKE study team and share best practice with each other - We look forward to seeing you there! Please contact the study team below for further information!

## Screening & Baseline

### #ReducePaperwork

**Screening:** F01 Screening form is not required for patients if it is more than 8 weeks since their stroke at the time you first consider them for the study/approach.

**Oxford Cognitive Screen:** Only the score sheet (with RETAKE header) needs to be returned to CTRU; the participant worksheet does not need to be sent.

### #PostalSystemCanBeSlow

Please get in touch as early as possible if you are becoming low on screening logs so we can print and post before you run out.

### #ConsentTips

Please check consent forms with the participant; ensure the statements are initialled (not ticked) and they have signed, printed their name and dated it. Remember the person taking consent should also sign, print their name and date it at the same time.

### #MissingData

If the study has been introduced, please remember to specify whether it was face-to-face or by letter on F01 Screening.

### #WhosWho?

Before returning to CTRU, please ensure baseline questionnaire booklets are stapled together; this minimises the risk of the pages becoming separated which is important as the booklet does not include the participant identifiers on each page, just the cover.

### #GDPR #DataProtection

Please remember to send any consent forms and contact detail CRFs separate to other trial/clinical data.

## Intervention Delivery

### #WeLoveData!

#### F20 ESSVR Intervention – Initial Visit/Session

Please return within one week of the intervention starting (or within 12 weeks of randomisation if it does not commence).

#### F22 ESSVR Intervention – Session Content

Please return these throughout intervention delivery. We would be grateful if you could return these completed forms on a monthly basis to maximise data return and manage data flow.

#### Has the participant been discharged from the intervention?

F21 ESSVR Intervention – Participant Summary and F23 ESSVR Intervention – Additional Activity should be sent within 2 weeks of the discharge date.
